TOYOTA

COASTER

**Actual vehicle may vary from illustration*

The Coaster delivers passengers to their destination in comfort and with peace of mind, even in harsh operating environments.

With the toughness to operate as a working vehicle for extended periods without a break, even on unpaved roads, an open interior with excellent access and extensive safety features in case of the unforeseen, the Coaster will let passengers enjoy a comfortable and reassuring ride to their destination.

Pursuing ease of use from the driver's perspective.

Function switches on the instrument panel are grouped within easy reach. Intuitive operation frees the driver from looking away from the road.

Vital information at a glance
Combination meters

They support monitoring of vital vehicle information, including extensive warning functions.

Redesigned for ease of use
Climate control panel

The climate control panel provides excellent visibility and ease of use.

Space for a binder and 1.5-liter plastic bottle
Front door pocket

CD with AM/FM and USB
Audio System

Hold 500ml plastic bottles
Cup holders

Suitable for passenger announcement
Microphone with Amplifier

Space for a binder for daily reports etc.*
Binder stand

Smartphone charging
Power outlet

*Please do not use the binder stand while driving

Providing occupants with a high-strength cabin.

Toyota has enhanced the body rigidity and safety measures to help provide occupant protection.

Contributing to occupant safety

SRS airbags (Driver & Front Passenger)

The Coaster features SRS driver's and front passenger's airbags. In the event of severe frontal collision, together with the seat belt, they help reduce the impact to the driver's and front passenger's head and upper torso.*

Secure restraint to help reduce impacts

3-point ELR seat belts with pretensioner and force limiter (Driver's & Front Passenger's Seats)

In severe frontal collisions, pretensioner rewinds the seat belts instantly to help assist driver and front passenger restraint. The force limiter helps to relieve excessive force on the upper torso.

*The SRS (Supplemental Restraint System) airbag is a supplemental device to be used with the seat belt. The driver and all passengers in the vehicle must wear their seat belts properly at all times. For details on these and other important safety features, be sure to read the Owner's Manual carefully.

Helping protect passengers in the event of an accident

Rigid body that complies with rollover regulations

To help provide peace of mind, the Coaster complies with the rollover regulations set out in UN-R66/02, a United Nations standard for evaluating the strength of bus bodies. After studying a range of body structures, the rigidity was enhanced to help create a safety zone in the vehicle's interior. The result is a high body rigidity which contributes to passengers' peace of mind.

Strong lightweight design

Circular frame/High-tensile steel sheeting

The circular frame structure connects the roof reinforcements, pillars and floor frame members to create a strong body. A center pillar near the front passenger's seat side further contributes to exceptional body rigidity for stable driving characteristics. In addition, optimizing placement of high-tensile steel sheeting contributes to body rigidity while reducing weight.

Extending the Coaster's reputation for excellent durability.

The Coaster withstands prolonged use even on unpaved roads and in harsh operating environments.

Enhanced durability

Anti-corrosion steel sheeting

The extensive use of anti-corrosion steel sheeting for the body contributes to exceptional durability and strength over the long-term, even in harsh operating environments, helping to keep the vehicle operating with excellent reliability.

Strong body welds

Laser welding

The use of laser welding creates high-strength bonds between the body panels.

Withstanding unpaved roads

Frame structure

The Coaster's proven, highly durable, frame withstands prolonged use, even on unpaved roads.

Simplifying maintenance to facilitate long-term use.

Efficient maintenance routines

Battery

The Coaster simplifies daily maintenance.

Helping to avoid hazards

ABS (Anti-lock Braking System)

ABS helps to prevent the wheels from locking up on slippery roads, contributing to stable steering control.

A roomy, spacious interior all passengers will find comfortable.

Spacious and relaxing

Roomy seats with ample space

Easy access

One of the most spacious interiors in its class

An array of amenities enhances interior comfort.

A bright interior with a large field of view

A spacious open feeling

Protection from strong sunlight

UV-reducing green glass

Made for a spacious interior

Air conditioning

Large step for easy access

Center doorstep

A peaceful space to enjoy conversation.

For a more relaxing interior

Reduced interior noise levels

Enhanced noise insulation enables passengers to enjoy talking during their trip. The extensive use of noise-absorbing and noise-insulating materials, including the floor panel covering the transmission, dramatically reduces noise reaching the interior from the engine compartment and outside the vehicle, creating a pleasant environment in which passengers can hear one another clearly.

Minimizing passenger fatigue with a comfortable ride.

Rear suspension

Front suspension

Rear stabilizer

Front stabilizer

A stable ride enhances comfort

Stabilizers (Front/Rear)

Stabilizers at both the front and the rear, deliver a comfortable and stable ride; even during large turns. In addition, the damping force of the shock absorbers has been optimized. The stable vehicle stance while cornering contributes to excellent passenger comfort.
